

Environmental Policy

Vibhavadi Medical Center Public Company Limited (“the Company”) operates private hospital, providing comprehensive medical services. The Company is committed to being a green hospital with environmental responsibility. Therefore, the Company has established an environmental policy in line with the goals and strategies of its business operations to make all employees aware of environmental care and conservation, and to encourage cooperation in implementing the policy to avoid impacting stakeholders. The Company has set the following policies and guidelines:

1. The Company is committed to environmental conservation and pollution prevention by setting environmental performance targets to reduce resource and energy consumption, as well as efficiently manage waste. These targets are used as indicators for environmental performance.
2. The Company promotes the reduction of emissions and the absorption of greenhouse gases from various activities of the hospital, employees, service users, partners, and related stakeholders throughout the supply chain to mitigate the wide-ranging impacts of climate change.
3. The Company promotes knowledge, awareness, and encourages all employees to cooperate in environmental conservation by providing training courses on environmental, occupational health, and safety, as well as raising awareness of environmental impacts.
4. The Company communicates its environmental policies and practices to all employees and interested parties through the Company's website.
5. The Company builds good relationships with government agencies, private sector, the community around the hospital, and other relevant entities to support and collaborate on environmental management and sustainable development.
6. The Company will operate in compliance with environmental laws and other relevant regulations.
